

Problem Statement:

Create a web application for shortening any URL by integrating a third party API.

UI Screen

Requirements:

- Integrate with the rel.ink API to build a fully-functional URL shortener
- View the optimal layout for the site depending on their device's screen size - Responsive
- Shorten any valid URL
- See a list of their shortened links, even after refreshing the browser
- Copy the shortened link to their clipboard in a single click
- Receive an error message when the form is submitted if:
 - The input field is empty
